

## ABOUT US

ABL-SF aims to provide higher risk-adjusted returns to the investors by investing in diversified portfolio of equity instruments offering capital gains and dividends. The fund is benchmarked to KSE-100 index. In case the Management Company expects the stock market to drop, based on the analysis of macroeconomic factors such as interest rates, economic growth rates, political climate, corporate earnings and stock market valuations the Management Company may temporarily allocate assets to other Authorized Investments, subject to the prescribed regulatory limits.

## FUND MANAGER'S COMMENTS - ABL STOCK FUND

August 2009 turned out to be a very good month for local stock market with KSE-100 rising by 955 points or 12.4% to close at 8,677. Your fund yielded a return of 11.14% during the month under review thereby achieving an inception to date return of 18.4%. Exceptionally strong foreign inflows were the highlight for the month with total inflows crossing \$95 mn mark, an eighteenth month high. Multitude of factors caused this sudden upsurge in foreign buying. Moody's, a reputed international rating agency, upgraded Pakistan's credit rating from B3 negative to B3 stable on August 17th, 2009. This was followed by a rating increase by S&P on August 24th from CCC+ to B-. On August 28th, Credit Default Swap on Pakistan's debt fell to 825 bps from 5,106 bps in October reflecting reduced risk on Pakistan's bond. All these factors were in turn an effect of enhanced IMF lending secured by the government earlier during the month.

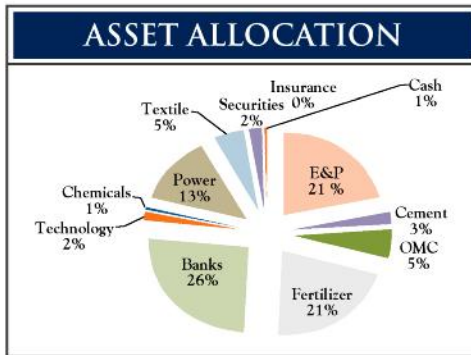

KSE-100 was mainly buoyed by the blue chip stocks in this rally, which we rightly predicted in our last month's FMR. E&P sector, in particular, led the rally during the month under review on back of heightened foreign interest, several fuel discoveries and healthy corporate results. Banking sector, although came into limelight later during the month, could not match the pace with the Oil & Gas Sector. Fertilizers, another sector in which your fund is heavily exposed, too could not rise in line with the general market as activity was chiefly concentrated in the E&P sector. Finally Power, yet another sector that we favor, gave decent returns during the month under review.

Your fund continues to be heavily invested into defensive and value sectors like Power, Fertilizers and E&P with low PERs and high dividend yields. Banking Sector, nevertheless, remains our top sector for this month as well. We believe that investors' interest will shift from Oil and Gas Sectors to broader market going forward as valuation differentials become more pronounced. In accordance with our broad strategy we will modify fund's exposures in specific sectors as and when economic and business cycles take a turn.

Auditors	A.F. Ferguson & Co
Benchmark	KSE-100 Index
Minimum Subscription	Growth Unit : Rs. 5,000/-

## FUTURE OUTLOOK

We expect foreign interest in local bourses to sustain in the upcoming month. International markets have moved up significantly in past few months on renewed hopes of global recovery. Not only has this increased risk appetite of global investors but also made our market appear more attractive in terms of relative valuation. Karachi Stock Exchange was trading at 39% discount to regional markets on month's close whereas historically this discount has been around 30%. Inflation numbers for August are expected to touch single digits, which will be a welcome change and a possible impetus for further interest rate cut in upcoming monetary policy. Finally re-launch of CFS financing will continue to attract attention in the coming month. As also highlighted in our last month's FMR it is necessary for volumes to pick up in order to make recovery witnessed this month sustainable.

## QUOTE OF THE MONTH

"Many shall be restored that now are fallen and many shall fall that are now in honor"  
 Benjamin Graham
