Investment Objective

The objective of ABL Income Fund is to earn superior risk adjusted rate of return by investing in a blend of short, medium, and long-term instruments, both within and outside Pakistan.

Fund Manager's Comments

ABL-IF yielded an annualized monthly return of 10.47% in July, 2010, an improvement of 21 bps over the previous month. The uptick in returns is mainly attributable to realigning of T-bills portfolio and placements in the money market at competitive rates. During the month of July, ABL-IF enhanced its T-bill portfolio by 18.49% to 64.75%. Investments were primarily made in shorter term T-bills to reduce the fund's duration from 92 days to 49 days. The duration was primarily reduced to hedge against any adverse movement in the interest rate environment which would help reduce interest rate volatility going ahead. Fund size increased by 8.9% to Rs.9,102 million during the month.

The SBP announced its bi-monthly Monetary Policy Statement (MPS) on last working day of the month and increased Discount Rate by 50 bps to 13% mainly due to higher inflation, fiscal deficit and Govt. borrowing from central bank. Furthermore, SBP highlighted challenges that continue to plague the economy including low revenue generation and higher government expenditure other than the development spending. The move was largely unexpected and has led to a 25-30bps jump in bond yields across the yield curve. ABL-IF, by taking a defensive position ahead of the MPS has been able to soften the impact of the rate hike and the return outlook now looks brighter after the increase in T-bills yield.

Going forward, ABL-IF will continue to take advantage of improvement in T-bill yields by adjusting its exposure and duration. In view of its continued need to borrow for funding the budget deficit and in the absence of committed foreign flows (IMF plus other soft loans), the Government is left with no option but to borrow from the banking system. Thus investments in T-bills will be maintained in order to yield higher returns whilst maintaining a low risk profile.

Investment Objective

ABL-SF aims to provide higher risk-adjusted returns to the investors by investing in diversified portfolio of equity instruments offering capital gains and dividends.

Fund Manager's Comments

July 2010 was an eventful month for equity investors in Pakistan. Trading volumes, which had hit an 18-month low at the beginning of the month after the introduction of capital gains tax (CGT), recovered sharply towards the end as foreign inflows continued unabated and hopes of introduction of leverage product resurfaced. Positive earning surprises, particularly from the fertilizer sector, further added to the bullish sentiments and local investors finally started to return to the market. However, a surprise 50 basis points increase in Discount Rate (DR) by SBP on July 30th, 2010 was seen as a major setback and might cap the market's performance in the short term.

ABL-SF performed a little below than its benchmark during the month, returning 9% against 9.7% appreciation in KSE-30. We increased our exposure to MCB, PPL and FFC during the month while shedding a little weight in PSO. All the changes made were tactical in nature and as such do not reflect any fundamental change in our positive outlook. Unit holders will be happy to learn that ABL SF achieved "MFR 5-Star" rating from JCR-VIS for the year ended June 30, 2010. MFR 5-Star rating is defined as "Very Good Performance" as per JCR-VIS's rating scheme and reflects highest possible rating a stock fund can achieve for its performance. ABL SF, as of July 31st, 2010, remains the best performing stock fund on Calendar Year to Date basis (Jan-July, 2010) amongst its peer group.

The results season has started on a positive note, highlighting the profitability and resilience of the corporate sector. Going forward, we expect market volumes to recover as investors look beyond the CGT issue and the leverage product is introduced. Foreign investment flows into the emerging markets remain strong and Pakistan continues to get a decent share. We remain optimistic on mid to long term performance of KSE as it is still trading at a significant discount to regional markets as well as to its own historic multiples. Patience, therefore, is key to success in these volatile times.
